P R E F A C E

The "Price Indices in Delhi-2014-15" is the revised and updated edition of the earlier publication prepared by this Directorate. The publication incorporates the time series of different Price Indices such as CPI for Industrial Workers and Wholesale Price Index. Efforts have been made to incorporate latest data in this publication.

The Publication has been prepared with a view that these indices are available at one place for reference as and when required. The Publication has been prepared by Price & Co-ordination Unit of this Directorate under the guidance and supervision of Dr. Shikha Anand, Dy. Director, Ms. Sunita Jain, Asstt. Director and Sh. Ashish Verma, S.O. The work of scrutiny and compilation has been done by Ms. Anuj Kumari,S.A, Sh. Ravinder Kumar, S.A, & Ms. Manju Saini,S.A.

I hope that the publication will be very useful for the study of price trends. Users will be able to view quickly the behavior of the prices over a period of time.

Suggestions, if any, are welcome for further improvement of this publication.

DELHI
September, 2015

Dr. B.K.SHARMA
DIRECTOR CUM SPL. SECRETARY

4.2	Index numbers of Wholesale prices in India by major groups and sub groups (Base Year 2004-05=100). 35-37

(iii)

INTRODUCTION

Prices affect all sections of society and as such price statistics are regarded as the most important economic data which influence/reflect the changes in economic activities. The changes in prices can be measured both in absolute and economic terms. The changes in prices over a period of time can be gauged by the statistical device of Index Numbers of prices.

Price indices are used as an instrument to measure the relative changes in the level of economic activities of a specified group / place with pre-determined purposes. Wholesale prices are mainly used to estimate rate of inflation in the economy, while Consumer Price Index measures the effect of prices on item basket affecting the living of a specified group of families. These price indices are the only instrument to measure the wages and salaries of specified categories of people in real terms (i.e. with respect of prices prevailed in the specified base year). In the economic analysis, price indices are commonly used as inflator or deflator as per the requirement of the study.

TYPES OF INDICES COMPILED

Following price indices are being compiled:

1. Consumer Price Index for industrial Workers
2. Consumer Price Index for Rural, Urban & Combined
3. Whole Sale Price Index

DATA SOURCES

- (1) Consumer Price Index for Industrial workers is being compiled by Labour Bureau, Shimla. This Index is compiled for 78 different centers in India. Each centre has been assigned a weight at all India level and accordingly C.P.I. at all India level is also being compiled.
- (2) Consumer Price Index for Rural, Urban & Combined is compiled by CSO, MOSPI, Govt. of India. This index is compiled for 310 towns and 1181 villages in India. Weighting diagrams (consumption patterns) of the CPI have derived from the results of the NSS 61st round of Consumer Expenditure Survey (2004-05). The base year for this index is 2010=100.
- (3) Wholesale price index is being compiled by Economic Advisor, Ministry of Industries, Govt. of India. This Index is being compiled at all India level.

PURPOSE

In this report, the index of all above mentioned indices is for the last ten years presented at all India level as well as State level. The weight assigned to each centre in every index is also incorporated. The report has been prepared with a view that different types of indices could be available at one place. The report also provides time series data to evaluate price trend.
