PREFACE

The provisional report on Survey of Households in Delhi is prepared on the basis of data on household characteristics collected during November 2018 to November 2019. Directorate of Economics and Statistics conducted survey of about 20.05 lakh households in Delhi. The report contains information on location particulars (status of the colony), ownership status of the house, household size, average monthly expenditure of the households etc., availability of drinking water & sewage system, ownership of motorized vehicles for personal use and availability of space for installation of Solar panel etc.

The data in the report is presented local body wise and district wise and provides indicators of household characteristics in Delhi. The data generated in this report will provide necessary information to policy makers, researchers and government to gauge the availability of infrastructure and successful implementation of social welfare schemes launched by Delhi Government from time to time.

The whole hearted participation of the Officers of Planning and Statistical cadre designated as Team leaders and Supervisors, Unemployed youth, part time workers and retired persons worked as field surveyors for conduct of the field work of the Survey of Households in Delhi is highly appreciated. We are also grateful to all the households who made this survey a success by providing requisite information.

I place on record my special gratitude to the valuable guidance and directions received from Dr. B. K. Sharma, Advisor Planning Department, tireless efforts put up by Central Team under leadership of Mrs. Manjubala Sahoo, Jt. Director and all the officers of Planning and Statistical Cadre for providing guidance and supervision in respect of the field work by field functionaries/scrutiny of data within stipulated time. The report has been prepared by Sh. K.R.Chhibber, Assistant Director, Dr. Ashutosh Kumar Srivastava, Assistant Director, Sh. Praveen Kumar Srivastava, System Analyst, Sh. Ajai Kumar Mathur, Statistical Officer, Ms. Neha Saini, and Ms. Saloni Gupta, Statistical Assistant under the supervision of Sh. C.K. Dutta, Joint Director.

I pay special thanks to M/S Transerve Technologies Private Limited for development of Mobile and Web Application and processing of data.

EXECUTIVE SUMMARY

- 1) This report has been prepared on the basis of survey of 20.05 lakh households and 1.02 crore population of Delhi.
- 2) 66.63% of households in Delhi have reported to be living in their Own dwelling units whereas, 32.38% households are reported to be living in rented accommodation.
- 3) The highest proportion (76.37%) of households with own accommodation are reported in Shahdara district.
- 4) The highest proportion i.e. 47.31% of households in Delhi are reported to be incurring Average Monthly Expenditure in the range of Rs.10,000-25,000/, followed by 42.59% households in the range of Rs. 0-10,000/.
- 5) 1.66% households in Delhi are reported to be incurring Average Monthly Expenditure in the range of Rs.50000/- and above.
- 6) 51.78% of the households are reported to own/possess Motorized Vehicles for personal use. Among these households 40.35% are having only two wheelers, 4.43% four wheelers only, whereas, 6.59% are having both two and four wheelers.
- 7) The highest ratio (50.78%) of households possessing only Two Wheelers in Delhi is reported in North East district, whereas, the highest proportion (9.17%) of households possessing only Four Wheelers is reported from New Delhi district.
- 8) Tap water is available to 81.84% households for drinking. Among these households, about 71% households reported to have availability of Tap water within premises.
- 9) The highest proportion of households i.e. 43.28% reported to be using Bottled water for drinking in South East District, followed by North District (18.86%).
- 10) Latrine facility within premises is available to 93.34% households. Among these households having Latrine facility within premises, 60.12% of

households are having type of latrine Flush/Pour linked to: Piped sewer System and 36.67% linked to Septic Tank.

- 11) Less than 1% households in Delhi are reported to be defecating in open.
- 12) Households in South West district had the highest proportion i.e. 98.22% of households in Delhi having latrine facility available within the household premises.
- 13) 40.78% households of Delhi have Ration cards issued by Food and Civil Supplies Department. Out of these households having Ration Card, 85.98% are availing ration from PDS.
- 14) The highest proportion (90.74%) of households with ration cards and availing ration from Public Distribution System is reported from North East District.
- 15) Out of total households covered in the survey and having their own house, 26.20% households have reported the availability of space for installation of Solar Panel.
- 16) In Delhi, 93.83% of the households surveyed are reported to be using only Mobile phones.
- 17) 21.27% households in the state are reported to use/possess Computer/Desktop/Laptop, out of which 80.15% households are using internet connection.
- 18) The proportion of the households having/possessing Air Conditioner in Delhi is reported to be 22.22%.
- 19) Demographic profile of Households under various Local Bodies has been depicted in Chapter-3.

CHAPTER – ONE

1.1 INTRODUCTION

Directorate of Economics & Statistics has been regularly conducting socio economic surveys in Delhi to capture vital information on various socio- economic indicators. However, DES generally conducts sample surveys designed by National Statistical Office, Ministry of Statistics & Programme Implementation. The sample blocks (First Stage Units) are selected by Survey Design and Research Division, Kolkata, on the basis of population as per Census 2011. Recently, it was felt by Delhi government that the results of sample surveys are not sufficient to depict the real time picture of requirements vis-à-vis availability of the infrastructure and social security.

1.2 OBJECTIVES

The survey aimed at collection of data on Socio-Economic indicators on door to door survey basis in lieu of sample survey in order to ascertain the availability of infrastructural i.e. educational, health, employment, social security and transport facility to Households of Delhi. The results of the survey may be of immense use to Delhi government to gauge the future requirements of educational institutions, hospitals, sewage system, transport etc. in the context of rapidly increasing population of Delhi. Further the data obtained may be used to judge the demographic changes on account of migration/immigration of Households from/in Delhi. The data obtained during the survey may be utilized by the government for plan formulation and policy making and for implementation of various welfare schemes in respect of disabled persons, widow pension etc.

1.3 COVERAGE

The survey was carried out in Rural as well as Urban Delhi on door to door basis. During the survey about 20 lakh usual resident households across various sectors have been covered. Rural sector of Delhi consists of 112 villages whereas Urban Delhi comprised of 5 statutory towns viz., South Delhi Municipal Corporation, East Delhi Municipal Corporation, North Delhi Municipal Corporation, Delhi Cantonment & 110 Census Towns. Census Town are those villages having a population of 5000 & above, at least 75% of male working population is employed in non-agricultural activities and density of population is

at least 400/sq km. There were 110 such census towns in Delhi as per Census-2011.

The smallest unit of survey in both rural and urban areas was the enumeration blocks (EBs) used in Population Census 2011 by ORGI. The field work of the survey has been completed in about 51% of the total Enumeration Blocks in Delhi.

1.4 FUNDS

The survey is completely funded by the Delhi Government. The expenditure on the survey during the financial year 2018-19 was Rs.4.74 crore and during financial year 2019-20 it was approximately Rs.21.87 crore. In total an amount of approx. Rs.26.61 was spent on the survey and other related items such as payment to field surveyors, One Consultant for preparing of RPF, development of web & mobile application with database analytics by hiring private agency and hiring 25 Statistical Assistant through ICSIL for survey work.

1.5 MANPOWER DEPLOYMENT & TRAINING

In order to conduct the field work of the Survey of Household in Delhi, DES has engaged about 6000 Field Surveyors (unemployed/part time/retired personnel) on short term basis. For effective supervision and timely completion of the survey 17 Teams, each consisting of 1 Team Leader (Deputy Director/Assistant Director) and 17 supervisors (Statistical Officers/Statistical Assistants) were deployed. Overall 17 Team Leaders and 300 Supervisors of Planning/Statistical Cadre were deployed for overall supervision of the field work carried out by Field Surveyors. All the field surveyors as well as Team Leaders/Supervisors were imparted one day training in two parts i.e. Concepts/Definitions and Technical training for capturing of the data through mobile application. Training was imparted during the months of November and December 2018 by the officers of this Directorate/Planning Department.

1.6 METHODOLOGY

1. DES has first time attempted to collect Household/Individual data through online mobile application.
2. An agency was hired through e-bidding for development of RFP document.
3. On the recommendation of Technical Committee under the chairmanship of Additional Chief Secretary, M/S Transerve Technologies Private Limited was

awarded the contract for development of mobile application for collection of data.

4. Mobile application viz. Transerve Data Collector was developed for canvassing of e-schedule in two parts i.e. Household Characteristics and Individual Details.
5. Frame of Population Census 2011 was used for conducting the field work of the survey. Accordingly, Abridged House Lists (AHL) and Enumeration Block Maps were obtained/ arranged from the Office of Director of Census Operations Delhi.
6. About 6000 field surveyors were appointed on short term basis. Training was imparted to field surveyors in batches.
7. Survey was to be conducted in all 272 wards of trifurcated MCD, 9 wards of NDMC and 8 wards of Delhi Cantonment Board Area.
8. For conduct of the field work of the survey efficiently and smoothly, 17 teams each consisting of 1 Team Leader (of the level of Deputy Director/Assistant Director) and 16-17 Supervisors (of the level of Statistical Assistant/Statistical Officer) were formed.

1.7 PERIOD OF FIELD OPERATIONS

The field work of the survey was commenced with effect from 10th November 2018 but due to imposition of Model Code of Conduct for general election to Lok Sabha 2019, field work remained suspended during March 2019 to May 2019. Due to non-availability of field surveyors the field work of the survey was terminated in the month of November 2019.

1.8 SCHEDULE CANVASSED

For the first time Delhi Government has collected information on households through e-schedule using mobile application (Transerve data Collector) developed by M/S Transerve Technologies Private Limited. The schedule was divided in two parts i.e. Household Characteristics (house number, location particulars, ownership status household size, average monthly expenditure, basic amenities available to households etc.) and Individual Details (age, sex, education, period of residency, employment status, disabilities and availability of medical facility & social security etc).

1.9 PUBLICITY

Wide publicity campaign was organized through Print media & Electronic media. Series of advertisements in the leading newspapers of Hindi, English, Urdu & Punjabi language were released for providing information & cooperation in this survey. In addition to above, publicity of the survey was made through FM channels. All the Resident Welfare Associations (RWA) were sensitized by sending letters.

1.10 LIMITATIONS

- 1) About 55% of the total projected population has been covered till the closing date of the survey. The population covered in this survey may not represent the actual population characteristics of Delhites. So, the data may be used by the users/policy makers with utmost care considering the under coverage of population to the extent of 45% of total population.
- 2) The data collection under the survey is not record-based, rather, based on oral information provided by the informant only. In other words, this method may involve some sort of under/over-reporting, unintended inaccuracy, recall lapse, casual approach, etc. on the part of the informants.
- 3) Majority of the enumerators engaged in the survey were unemployed youth followed by retired/part time personnel, who were totally new to such type of survey work.
- 4) Survey was subject to some amount of coverage error on account of such under-listing which is difficult to eliminate totally in massive survey operation.
- 5) Number of population/households covered in NDMC & Delhi Cantonment area is considerably low. So, data in respect of these two Local Bodies may not represent true picture of overall population.

CHAPTER - TWO

2.1 CONCEPTS & DEFINITIONS

HOUSE

House is a building or a part of building having separate main entrance from road, common passage, courtyard etc. It may be used for residential or non-residential purpose or both or even may be vacant.

HOUSEHOLD

A 'HOUSEHOLD' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. The persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a house but do not take their meals from the common kitchen, then they will not collectively constitute a household. Each such person should be treated as a separate household.

There may be one-member households, two-member households or multi-member households. You may come across three types of households namely, (i) Normal households, (ii) Institutional households and (iii) Houseless households. In this survey, only the Normal Households are to be covered. Institutional and Houseless households are outside the coverage of this survey.

In a few situations, it may be difficult to strictly apply the definition of households as given above. For example, a person living alone in a house, whether cooking meals or not, will have to be treated as a household. Similarly, if husband and wife or a group of related persons are normally living together in a house but are getting cooked meals from outside due to some reason, will also constitute a Normal Household.

Institutional Households like Boarding House, Mess, hostels, Hotel, Rescue Home, Night Shelter, Observation Home, Beggars' Home, Jail, Ashram, Old Age Home, Children Home, Orphanage, etc are excluded from this survey. However, the households living inside the campus of institution in the quarters are to be covered.

Example: Quarters of Jailor, Guard etc. located inside the Jail premises, household of Supervisor, Attendant etc. located inside the premises of Boarding house etc. will be enumerated.

Houseless Households which do not live in buildings or houses but live in the open or roadside, pavements, under fly-over and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are also kept outside the coverage of this survey.

Who are be considered as Usual Member of the household for enumeration

- Persons staying continuously at least for a period of 6 months or who has the intention to stay for at least 6 months period as on the date of enumeration.
- Members with temporary stay out with duration of less than 6 months.
- Household member who is away from home for attending educational institution for any duration and is expected to come back home after completion of the course.

Example: A student is away from home and staying in a hostel for a period of 2 years in Hyderabad and expected to come back to his/ her parent's household in Delhi after completion of course, he /she will be enumerated as usual member of the parent's household.

Who are not be considered as Usual Member of the household for enumeration

- Temporary visitors and guests whose total period of stay is less than 6 months as on the date of enumeration.
- Members who have permanently migrated or left the household due to marriage, employment etc., even if they occasionally visit the household
- A resident employee or domestic servant or a paying guest taking common meal and living with the household will not be treated as household member. However, they will be treated as separate household provided that their stay or intention to stay is at least for 6 months at the present address.

HEAD OF THE HOUSEHOLD

The head of the household for the purpose of this survey is a person who bears the main responsibility for the maintenance of the household and takes most of the decisions on behalf of the household and recognized as such in the

household. The head of the household need not necessarily be the eldest male member, but can be a female or a younger member of either sex normally residing in the household.

HOUSEHOLD PREMISES

For this survey, household premises is defined as the dwelling unit of the household together with the courtyard, compound, garden, out-house, place of worship, garage, family graveyard, guest house, shop and offices for running household enterprises, tanks, wells, latrines, drains and boundary walls annexed to the dwelling unit which are under the possession of the household.

REFERENCE TIME/ PERIOD

Normally, it is the date of enumeration of household. For some specific indicators like Income, Work Participation etc. the reference period will be last 365 days (one year) preceding the date of enumeration.

CHAPTER-THREE

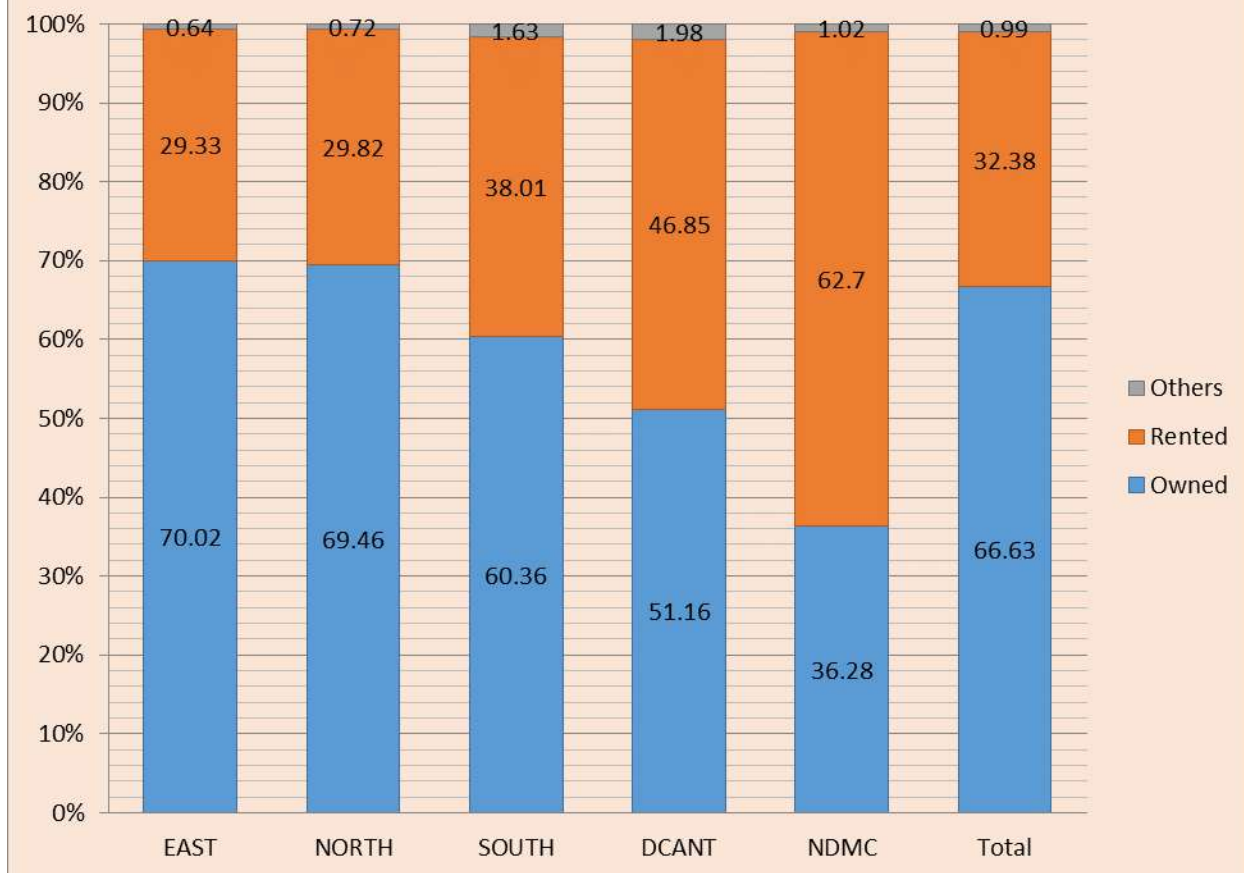

Households Characteristics

3.1 Distribution of Households by their Ownership Status of dwelling units/accommodation:

Dwelling Unit is defined as the accommodation occupied by a household for its residential purpose. It may be an entire structure or a part thereof or may consist of more than one structure. A threefold classification of dwelling units based upon the status of occupancy of the households in those units has been adopted in the survey. Threefold classification are (i) owned (ii) rented and (iii) other accommodation. Maximum number of households surveyed (66.63%) are reported to have owned dwelling units in Delhi, followed, 32.38% households living in rented accommodation. On local body wise comparison it has been noticed that highest proportion i.e. 70.02% of households having own accommodation are reported to be residents of the localities under jurisdiction of East Delhi Municipal Corporation, whereas, the highest proportion i.e. 62.70% of households residing in rented accommodation are reported to be falling in the localities under jurisdiction of New Delhi Municipal Council.

Local Bodies		Owned	Rented	Others	Total
MCD	EAST	70.02	29.33	0.64	100
	NORTH	69.46	29.82	0.72	100
	SOUTH	60.36	38.01	1.63	100
	TOTAL	66.68	32.33	0.99	100
DCANT		51.16	46.85	1.98	100
NDMC		36.28	62.70	1.02	100
Total		66.63	32.38	0.99	100

Chart 3.1-Distribution of Households in Local Bodies by Ownership Status (in %)

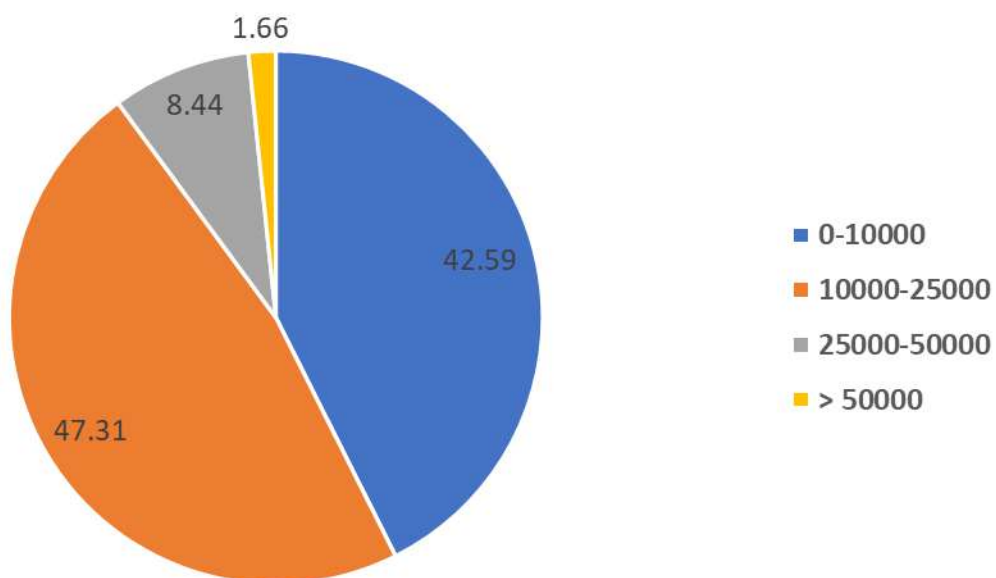

3.2 Distribution of households by Average Monthly Expenditure Classes (in Rs.):

Household consumer expenditure is the total of the monetary values of consumption of various groups of items. This indicator is amongst the most important measures of the level of living of the respective domains of the population, and is used extensively for the study of poverty and inequality. The highest proportion i.e. 47.31% of households in Delhi are reported to be incurring monthly average expenditure in the range of Rs.10000-25000/-, followed by 42.59% households incurring average expenditure in the range of Rs. 10,000/- and below. The least number of households i.e. 1.66% in Delhi are reported to be incurring monthly expenditure in the range of Rs.50000 and above.

TABLE 3.2: Distribution of households in Local Bodies by Different Average Monthly Expenditure Classes (in %)						
Local Bodies		Monthly Expenditure (in Rs.)				
		0-10000	10000-25000	25000-50000	> 50000	ALL
MCD	EAST	40.01	50.60	7.91	1.48	100
	NORTH	48.54	40.97	8.50	2.00	100
	SOUTH	38.16	51.62	8.78	1.44	100
	TOTAL	42.63	47.30	8.41	1.66	100
DCANT		33.91	64.62	1.25	0.22	100
NDMC		17.79	31.24	49.46	1.50	100
Total		42.59	47.31	8.44	1.66	100

Chart 3.2: Distribution of households by different Average Monthly Expenditure Classes (%)

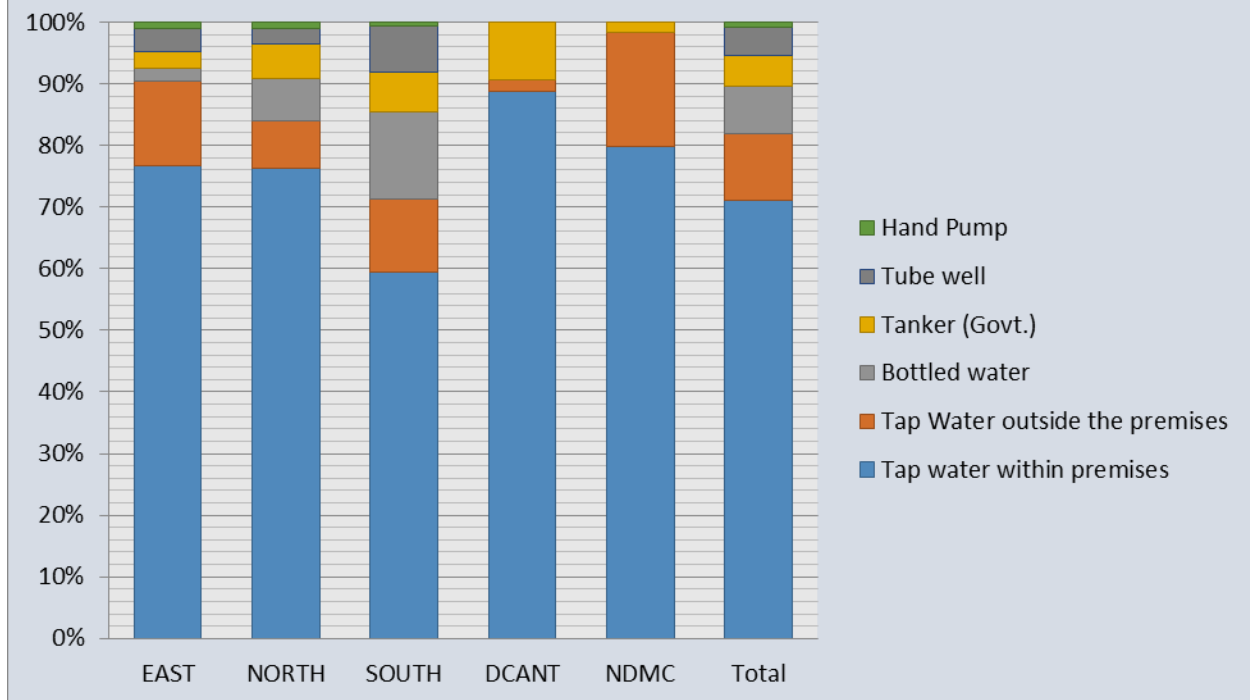

3.3 Distribution of Households by Major Source of Drinking Water:

Drinking water, also known as potable water, is water that is safe to drink or to use for food preparation. Availability of sufficient drinking water is prerequisite for healthy life. It has been reported in the survey that tap water for drinking is available to about 82% of the households in Delhi. Among these households, tap water within premises is available to 70.98% households for drinking purpose, whereas, tap water outside the premises is available to 10.86% households. The least number of households (0.94%) in Delhi are reported to be drinking Hand Pump water. Further, it has been noticed that substantial number of households are using Bottled water (7.76%) and water supplied through Government tankers (5.04%) for drinking purpose. Households of South MCD are reported to be using maximum bottled water (13.98%) among all local bodies whereas, maximum proportion of households i.e. 9.36% getting water from Government Tankers have been reported from areas under jurisdiction of Delhi Cantonment Board (Local Body).

Local Bodies		Tap water within premises	Tap Water outside the premises	Bottled water	Tanker (Govt.)	Tube well	Hand Pump	Total
MCD	EAST	76.77	13.60	2.21	2.62	3.65	1.15	100
	NORTH	76.28	7.73	6.85	5.65	2.46	1.02	100
	SOUTH	59.40	11.99	13.98	6.55	7.42	0.67	100
	TOTAL	70.95	10.86	7.78	5.04	4.42	0.95	100
DCANT		88.70	1.86	0.09	9.36	0.00	0.00	100
NDMC		79.90	18.44	0.05	1.61	0.00	0.00	100
Total		70.98	10.86	7.76	5.04	4.42	0.94	100

Chart 3.3: Distribution of Households in Local Bodies by Major Source of Drinking Water (in %)

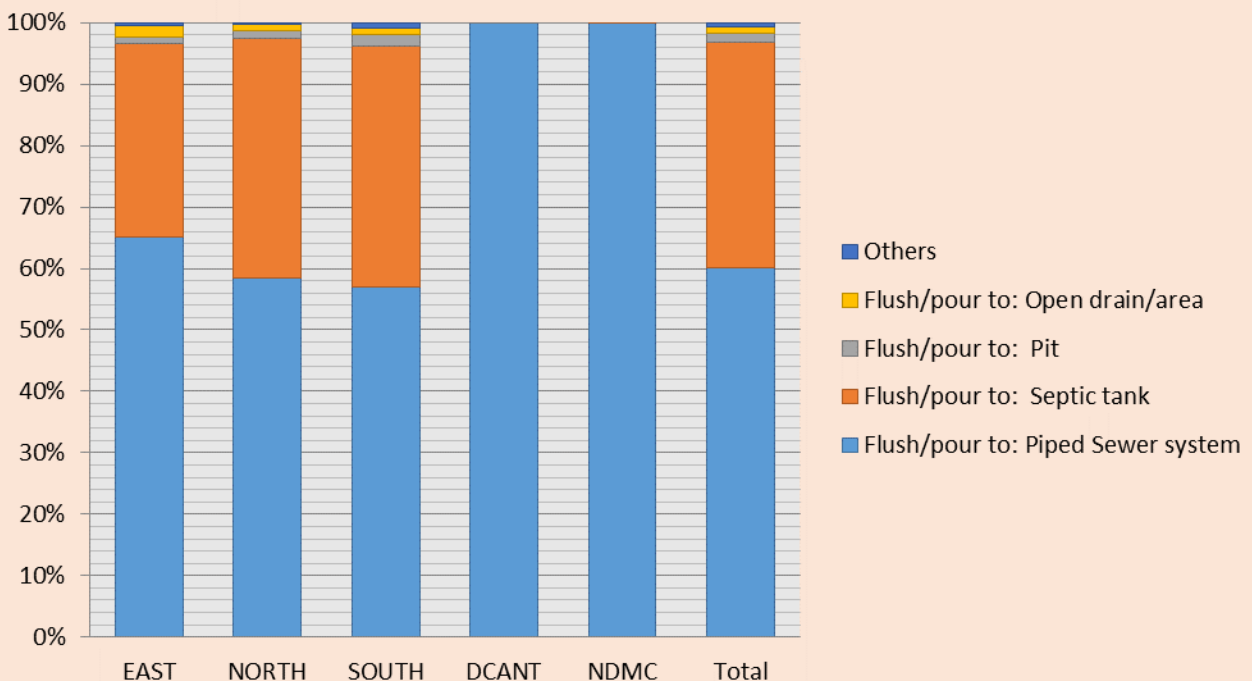

3.4 Distribution of Households by Type of Latrine used:

Safe sanitation means promotion of safe disposal of human excreta, right use of toilet and avoiding open defecation as well as management of solid and liquid waste. In managing safe sanitation at each level - household, community, and governments, understanding impacts of poor sanitation, contribution of all key stakeholders including communities, implementation of safe sanitation processes is considered crucial. During the survey it has been reported that in Delhi, latrine facility within premises is available to 93.34% households, whereas, Public/Community latrine is being used by 6.09% households and only 0.57% households are defecating in open. Amongst the households using Latrine facility within premises, Piped sewer system is available to maximum households (60.12%), followed by 36.67% households having Septic tank arrangement of Sewer system, still 1.19% of the households in Delhi are using Flush/Pour Flush linked to Open Drain/Open Area.

TABLE 3.4: Distribution of households in Local Bodies by Type of Latrine within premises (in %)							
Local Bodies		Flush/pour to: Piped Sewer system	Flush/pour to: Septic tank	Flush/pour to: Pit	Flush/pour to: Open drain/area	Others	Total
MCD	EAST	65.04	31.49	1.21	1.69	0.57	100
	NORTH	58.54	38.92	1.30	0.92	0.31	100
	SOUTH	57.07	39.18	1.76	1.04	0.95	100

DCANT		99.95	0.00	0.05	0.00	0.00	100
NDMC		99.93	0.07	0.00	0.00	0.00	100
Total		60.12	36.67	1.42	1.19	0.60	100

Chart 3.4: Distribution of households in Local Bodies by Type Of Latrine (within premises) (in %)

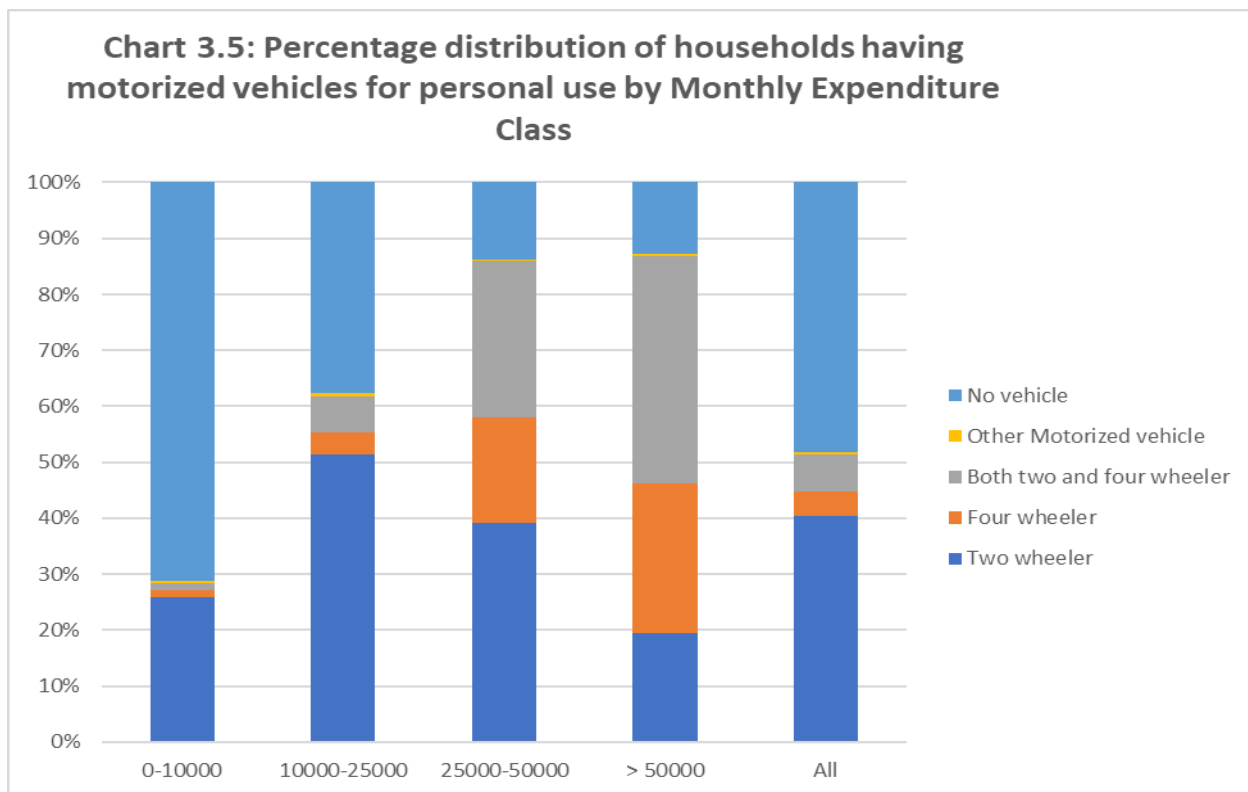

3.5 Distribution of households having Motorized Vehicles for personal use in various Monthly Expenditure Classes:

The changing composition of vehicle population over time reflects an increasing importance of personalized mode (cars & two-wheelers) of transport vis-à-vis public bus road transport mode. In the coming years, the profile of motorization is expected to witness a number of changes in terms of segment shifts, driven by rising incomes, desire for safety and comfort and government regulations. Over the short term, the sensitivity of demand for vehicles to changes in GDP and in vehicle price is somewhat elastic as their purchase can often be delayed, but in the long term it has low elasticity, indicating that personal mobility is considered by many as essential to everyday living and that it has few substitutes. Thus, other measures are required as well to restrain growth in personal motor vehicle and associated negative externalities. In Delhi out of 20.05 lakh households surveyed, 51.78% of the households are reported to be owned/possessing motorized vehicles for personal use. The number of households who possess only Two wheelers in Delhi are 40.35% whereas 4.34% households possess only Four Wheelers, 6.59% households possess both Two & Four Wheelers and 0.50% households possess “Other Motorized Vehicles” for personal use. It is seen in the table that households in the Average Monthly Expenditure group of Rs.10,000 to Rs.25,000/- own highest number of Two wheelers only, whereas, households in the group more than Rs. 50,000 are reported to be possessing maximum number of Four wheelers only for personal use.

Table 3.5: Distribution of households in local bodies having motorized vehicles for personal use by monthly expenditure class (in %)

Local bodies	Monthly Expenditure	Two-wheeler	Four-wheeler	Both two and four-wheeler	Other Motorized vehicle	No vehicle	Total

3.6 Distribution of households having Ration Cards and drawing ration:

Ration card is a document issued by the State Government which indicates an individual's economic status. It is a voluntary document and not compulsory for every citizen to obtain, but people generally apply for it as a well-accepted identity proof and helps an individual avail various Government benefits through this scheme. Ration cards have multiple categories which are issued by the earning capacity of an individual. Different states have different schemes but are based on an individual annual income. Ration cards are issued based upon the total members in a family, and each category of the ration card determines an individual's entitlement to certain rationed goods. In Delhi 40.78% of the households surveyed are having ration cards issued by Food and Supplies Department, out of which about 86% households are availing ration from the Public Distribution system. The highest proportion of households having ration cards and drawing ration from PDS amongst trifurcated MCD is reported in localities falling under East Delhi Municipal Corporation.

Local Bodies		Households Having Ration Card			Households having Ration Card and Availing Ration from PDS		
		No	Yes	TOTAL	No	Yes	All

3.7 Distribution of households on Availability of area for Installing Solar Panel:

By installing solar rooftop systems, people can generate their own energy and use it for different purposes. These panels are eco-friendly and they can help in curbing the user's carbon footprint. The generated energy can be used to power residential, commercial or industrial buildings. In fact, people can even supply excess electricity to the grid and make some money out of it. Thus, a rooftop solar system is a worthy investment. Out of the households surveyed, 13.36 lakh (66.63%) households are reported to have Own houses. Amongst these households, 26.20% of the households have reported the availability of space required for installation of Solar Panel. Maximum number of households having own dwelling units along with space available for installation of solar panel are reported to be residing in areas falling under the jurisdiction of South MCD.
