**Meeting on flood preparedness for the monsoon of 2019
held on 07.05.2019 at 1500 Hrs. at Kalindi Bhawan, CWC, New Delhi**

Brief Record of Discussions

A meeting for flood preparedness for the monsoon of 2019 was held under the chairmanship of Chief Engineer, Yamuna Basin Organisation, New Delhi in his Chamber at Kalindi Bhawan, New Delhi. The List of participants is annexed herewith.

At the outset, Chief Engineer, YBO, CWC welcomed all the participants. He recalled that last year, there were atleast three major flood events in Yamuna, and congratulated the participants for successfully managing the events. The representative of Govt. of Delhi, UP and Rajasthan also expressed their appreciation for precise forecasts issued by CWC during the last monsoon, due to which the State Governments could plan the ensuing activities effectively. The representatives from Delhi had special praise for the precision of flood forecasting last year by CWC, and hoped that in the current year also similar precise forecasts would be issued by CWC.

Thereafter, the problems faced last year, as well as preparedness for the coming monsoon, was reviewed. One such issue that needed to be addressed discussed during the meeting, pertained to warning and danger levels for Yamuna at Delhi Railway Bridge being presently pegged at levels which urgently require enhancement of atleast 0.75 to 1 m, in view of construction of embankments on the river in last so many years. Due to the present low warning and danger level, a large no. of redundant forecasts are being issued, which invite avoidable concerns from various levels. After detailed deliberations, it was decided that though there was a need for raising the levels higher, yet to begin with, the warning and danger levels be increased by 0.5 m each. Thus the provisionally revised Warning level to 204.50 m and Danger level to 205.33 m at Delhi Railway Bridge was decided for the current year. It was further decided that, based on the performance at these levels, further view in the matter would be taken after the current monsoon.

Further, Executive Engineer, Upper Yamuna, Division, CWC, New Delhi raised the requirement of more prompt response of authorities at Okhla Barrage, for opening of Gates during flood events. It was clarified by the representative of Uttar Pradesh, that the Okhla Barrage authorities are required to maintain a certain pond level at Okhla barrage, to enable offtaking by Agra Canal, due to which sometimes gates are not opened promptly during flood predictions. After detailed deliberations, it was decided that the issue can be best addressed with close coordination between Govt. of Delhi, CWC and Okhla Barrage authorities of Govt. of UP. The Chairman requested leveraging of technology such as whatsapp group etc., for better sharing of information and coordination. It was decided that UYD, CWC shall create and manage a Whatsapp group in which all stake holders shall be included, and used for common issues pertaining to the monsoon period only. The Chairman further requested the Govt. of UP representatives to ensure that in the event of flood peaks, for that limited period, priority may be assigned to minimising Yamuna levels in Delhi, which at times may even require compromising with offtaking schedule at Agra Canal.

Representative from Uttar Pradesh Govt raised issues related to widening of Flood Passage at Delhi Railway Bridge and at Wazirabad, to enable passing of peaks with minimal increase in gauge levels. It was informed by the participants from Delhi that the present available passage does not provide any handicap in this regard. However, the Chairman requested them to explore the possibility of getting the other bays which are presently silted up, dredged to the possible extent.

Thereafter, Executive Engineer, Chambal Division, Jaipur stressed the need for providing threshold value for issue of inflow forecast for the nine reservoirs of Rajasthan for which inflow flood forecast are to be issued from this monsoon season, namely i) Parbati Pickup Weir, ii) Parwan Pickup Weir, iii) Kalisindh Dam, iv) Gudha Dam, v) Bisalpur Dam, vi) Gambhiri Dam, vii) Panchana Dam, viii) Kota Barrage and ix) Rana Pratap Sagar Dam. The participant from Rajasthan assured prompt response in this regard. The Chairman desired that the same be provided latest by 21st May, 2019. Further, it was informed that CWC shall also undertake issue of level forecast for Kota city from this monsoon, for which danger and warning levels have already been fixed in consultation with the District administration. However, Executive Engineer, Chambal Division, CWC, informed that the levels as well as releases from Kota Barrage shall be an essential input for the same. Govt. of Rajasthan representative assured of full cooperation from his Government in this regard. The Chairman requested Executive Engineer, Chambal Division, CWC, Jaipur to sit with the Kota Barrage authorities and understand the system of data dissemination for levels in the Barrage as well as releases they are presently using. If required, fine tuning of the existing arrangements be got done to enable effective level forecast for Kota City.

The representative from Rajasthan expressed the need for real-time sharing of data acquired by the CWC telemetry station installed at Bisalpur Dam. The Executive Engineer, Chambal Division, Jaipur informed that Data pertaining to levels are already being sent to State Water Data Centre, Jaipur. However, for sharing in real-time, he requested the project authorities to submit a written request, based on which necessary approvals shall be sought from CWC HQ.

Chief Engineer, YBO thanked all the participants for coming and sharing their views, and assured all assistance from CWC during the current monsoon. The meeting ended with a vote of thanks to the Chair.

Annexure
